Remzi Atay

I am a motivated software engineer aiming to grow my knowledge and experience by working on enterprise-level applications. I define myself as a frontend developer since that's what I love to do. But I have used Java for 4 years and Python for a year during college times, so I feel very confident with those as well. I always have a project to work on or a new technology to dive in (recently learning serverless architectures). I'm ready to learn any language, library or framework that is required for my job.

I'm currently residing in Gdańsk, Poland and **I do not need a work permit**.

📍 Olsztyńska 3C/115, 80-395 Gdańsk

Education

🎓 Oct 2016 – Jan 2020
Kocaeli University
Computer Science

🎓 Oct 2017 – Feb 2018
Uniwersytet im. Adama Mickiewicza w Poznaniu
Computer Science

Work Experience

🏢 Intern Machine Learning Engineer • **Kocaeli University Smart Systems Laboratory**

July 2019 – January 2020

- Worked for my professor on designing Machine Learning modals to detect network attacks.
- Published a presentation for an NIST workshop and 2 articles on an IEEE conference and a journal
- Trained a sophomore colleague on basic statistics, machine learning and deep learning concepts.
